LEVEL 2
CRAFT ENGINEERING

PLEASE TURN OVER FOR THE OVERVIEW TABLE

Craft Engineers use metal, plastic or wood to make parts for a range of industries, including construction, agriculture, technology and more.

The Craft Engineering course will teach you the foundations of manufacturing and engineering, allowing you to try your hand at some of the fundamental equipment of manufacturing, including punch machines, press brakes, laser operations, and more.

After completion of this course there is a possibility to work in Alpha Manufacturing as a machine operator or Bri-Stor Systems — vehicle fitment and tools.

QUALIFICATION

Level 2 Craft Engineer

DURATION

12-month course

SALARY

Starting salary from £16,640

PREREQUISITES

4 GCSEs including Maths and English preferred but not essential.

Candidates that do not hold a suitable Maths or English qualification can complete initial assessments to gain Functional Skills at level 2.

- Continued mentoring for the first year post apprenticeship completion
- Achievements are celebrated at an annual awards evening

THE APPRENTICESHIP PROGRAMME

ENGINEERING APPRENTICESHIPS
EXCELLENT EMPLOYER
June 2026 – June 2028

ABOUT THE HEX GROUP

The HEX Group is a family-owned manufacturing and engineering business based in Hixon, Staffordshire. For over 40 years, our strategy has been about delivering consistent, organic growth by continually advancing our engineering and manufacturing capabilities and supporting customers who share our commitment to excellence.

In 2022, we became The HEX Group, a reflection of our group presence as six divisions. Operating in new and diversified markets, and with a strong balance sheet, our aim is to continuously invest in our people and processes. We are also committed to becoming a carbon-neutral business by 2037.

OUR PURPOSE & VALUES

Innovation is at the heart of The HEX Group and unites us in our purpose — to design and manufacture products that are the best available in the markets we serve and delivered with unrivalled customer service.

We are a proud business and each and every one of our colleagues is held accountable to our strongly embedded values; they are our guiding principles and underpin every decision we make, and every action we take.

As a forward-thinking company, we have developed an outstanding apprenticeship programme. This ensures we are helping in the development of new talent, creating outstanding opportunities for young people in the Staffordshire region.

ABOUT THE APPRENTICESHIP PROGRAMME

At The HEX Group, we're passionate about our young learners, which is why we continuously find new ways to make our four programmes exciting, dynamic and relevant to today's fast-paced world of work.

Each year, we recruit apprentices from local schools and colleges in the area surrounding The HEX Group headquarters in Hixon, Staffordshire. Our selective cohort sizes allow us to give our apprentices the time and care needed, ensuring they have all the guidance required to excel in their chosen pathway.

Since we launched our fully-accredited Apprenticeship Scheme in 2010, we have recruited over 220 apprentices. We are proud to have offered all graduates a full-time role within The HEX Group divisions.

This reflects the value we place on our apprentices. We see the enormous potential they bring to our business and continue to develop our schemes year-on-year to create the best possible learning environment.

Many of our apprentices go on to further their careers in one of our businesses and those with exceptionally high levels of drive and determination can go on to further educational courses. We even sponsor some of our graduate apprentices to complete a full degree.

Each year we build on the range of courses and the number of apprentices that are accepted into the business. Today, we have 55 apprentices, accounting for almost 10% of our total workforce.

IS ONE OF OUR APPRENTICESHIP SCHEMES RIGHT FOR YOU?

Across The HEX Group divisions, we service a vast range of industries, including automotive, agricultural, interiors, aerospace, utilities, and construction. We even make products for the garden lifestyle sector.

You can expect an exciting and varied career at The HEX Group, learning cutting-edge manufacturing techniques and using the very latest technology to learn core engineering skills. Every year we expand the opportunities available across many disciplines, reflecting our commitment to delivering a wider range of routes for young people starting their career.

TIMELINES

You will be able to apply online by uploading your CV from 1 November 2026.

Each year, we host an open evening where you can visit The HEX Group with your family and have a tour of the facilities at our Hixon site. **This will be hosted on 11 February 2027, which you can register for online.**

We close our applications in March and start our interview process in April. This is followed by assessment centres to determine the best applicants.

Following the assessment days, we have a period of reviewing applications before contacting those that are successful. Upon confirmation of acceptance, we take time to meet successful applicants with fun and informal Keep In Touch Days and induction activities.
